GRAIN QUALITY, THE AUSTRALIAN WAY

The **GrainVantage™** instrument has been designed with portability in mind to give users freedom to measure grain in-field, at grain storage sites and at grain processing locations. The durable design makes it ideal to carry in the ute or header and it has an automated shutter which protects the sensors from external influences and adverse conditions. Made in Europe and competitively priced, with uncompromising quality and build standards, **GrainVantage™** instruments have been tested and calibrated using the National Measurement Institute (NMI) certified IM 9500 analyser to provide you with highly accurate data which you can rely on.

GrainVantage™ units are competitively priced. Please contact us for a quote.

*The **GrainVantage™** offers portability and the convenience of being able to constantly monitor protein and moisture in the paddock during harvest. It's also the best value for money on the market.*

LYNDON PFEFFER – MILLMERRAN, QLD

*We have found the portability, operation, relative accuracy, backup and alternative power options of the **GrainVantage™** grain analyser to be indispensable.*

ANDY DUNCAN – RAVENSTHORPE, WA

*The **GrainVantage™** accurately measures wheat and sorghum moisture on the go and its speedy analysis was important minimising downtime during harvest.*

BRUCE WATSON – PARKES, NSW

BENEFITS

RIGHT DECISIONS AT THE RIGHT TIME

- ✓ Determine grain harvest quality
- ✓ Support your binning decisions
- ✓ Grain transport timing and efficiency
- ✓ Accurately manage your grain assets

RUGGED

- ✓ Designed for Australian conditions
- ✓ Tough optics and automated dust shutter for low maintenance
- ✓ Ideal for use on-farm or at grain storage facilities

ACCURATE

- ✓ Fully factory tested and calibrated
- ✓ Temperature stabilisation tested
- ✓ Results aligned using NMI certified IM 9500 analyser
- ✓ Calibrated to your local receival site

PORTABLE

- ✓ Light enough to take anywhere – 7kg
- ✓ Powered by 240V, 12V or rechargeable battery (up to 2 hours)
- ✓ Suitable for the ute, header cab or at the silos
- ✓ Size (mm): 335(h) x 270(l) x 270(d)

WHAT'S INCLUDED: • 240V and 12V adaptors • Single sample cell (buyers choice) • Sturdy carry/storage bag • Calibration and technical support • 12 month warranty • Solid wooden transport/storage box

Extras sold separately: • Additional sample cells • GPS for location specific measurements
